**TOWN OF MILAN COMPREHENSIVE EMERGENCY MANAGEMENT PLAN  
ANNEX IV**

**The following information is PRIVILEGED & CONFIDENTIAL.**

**Equipment Inventories**

**Auxiliary Power Supply:**

The following facilities have emergency generators providing a backup power source and are capable of being self sufficient:

Town Hall  
Highway Garage  
Fire Station 1  
Fire Station 2  
Fire Station 3

**Fuel For Vehicles:**

All departments obtain their motor vehicle fuel at the Town Garage and the fuel pumps at the Town Garage operate on an emergency power source.

In an emergency requiring activation of this plan, the fire departments can be notified

through the Dutchess County department of Emergency Response. Town Officials and Town Highway Department management personnel would have to be contacted by telephone.

The Town Highway Department maintains a two-way mobile radio system, as do the three fire company stations. Only the three fire departments have the ability to confer with each other.
